

In the Claims:

Amend claims 1, 5 and 7 as follows:

5u3
b1
as
1. (Amended) An electrical hand held tool for producing at least a percussion movement of a working tool, comprising an electrical drive; a first, oscillating subassembly including a percussion mechanism (2) for transmitting the percussion movement to the working tool, and a rotor (5) of the electrical drive and rotatable about a rotor axis (B) extending parallel to an oscillation path (I) of the first subassembly; and a second subassembly including a housing (6) in which the first subassembly is supported for a limited movement along a tool axis (A).

a6
5. (Amended) An electrical hand-held tool according to claim 1, wherein the rotor is formed as a brushless rotor.

5u3
b1
a7
7. (Amended) An electrical hand-held tool according to claim 1, further comprising elastic spring means (9) for providing a vibration decoupling connection of the first subassembly with the second subassembly.

In the Abstract:

Replace the presently pending abstract of the Disclosure with a new Abstract of the Disclosure as follows:
